Hello there,

How can I summarize these two lines in just one line of code?

```
if (line[0] eq 'i_rng_wf' and n_elements(line) ne 4002) then message,  
$  
'The # of samples per shot is not valid.'  
if (line[0] eq 'i_rng_wf' and n_elements(line) ne 10882) then message,  
$  
'The # of samples per shot is not valid.'
```

...I thought using OR would do the trick, but I guess I'm missing something here:

```
if (line[0] eq 'i_rng_wf' and n_elements(line) ne (4002 or 10882))  
then message, ...
```

Thanks
