I have 3 different datasets, x1y1,x2y2,x3y3, with different number of elements but about the same range of values. Each element of x1,x2 and x3 have different width. As far as I know, using Bar_Plot we can't have multiple widths for each element. Any suggestion?

Bar_Plot, y1

Bar_Plot, y2,/overplot

Bar_Plot, y3,/overplot

Im not sure if I expressed the issue clearly?
