I have 3 differernt datasets, x1y1,x2y2,x3y3, with different number of elements but about the same range of values. Each element of x1,x2 and x3 have differernt width. As far as I know, using Bar\_Plot we cant have multiple widths for each element. Any suggestion?

Bar\_Plot, y1

Bar\_Plot, y2,/overplot

Bar\_Plot, y3,/overplot

Im not sure if I expressed the issue clearly?
