I want envi files to input in itpfind (kennedy and cohen 2003) idl code for image tie point. But the itpfind code needs header file with following information;

BANDS: ok

ROWS: ok

COLS: ok

DATATYPE: ok

UL_X_COORDINATE: ?

UL_Y_COORDINATE: ?

LR_X_COORDINATE: ?

LR_Y_COORDINATE: ?

PIXEL_WIDTH: ok

PIXEL_HEIGHT: ok

Could anybody suggest me how to put (?) information in envi hdr file?
Any help will be much appreciated.
