Dear all,

I want to create a color table with the following values:

index	red	green	blue
0	0	0	0
28	100	30	150
46	120	20	40
89	20	20	255
153	0	200	230
255	50	220	80

I tried with the xpalette, but when I interpolate, it just gives everything green. Am I doing something wrong? Is there a simple way to do this?

Thanks!

Pablo
