Hello Eveyone,

I attempted to plot two images

```
img1=fltarr(512,512)
```

```
img2=fltarr(108,128)
```

How do I plot them for (EPS output) in a layout of !

P.Multi=[0,2,1,0,0]. plot them with the same height while keeping the aspect ratio to reflect their real size, as img2 is part of img1 and scaled to illustrate the details.

Thanks
