Hi,
I am trying to search across ALL .pro files that are open in the editor in IDL 8, but I cannot figure how to do that. "Find" only searches the current document and I cannot get "Search" to return any results. What am i missing about this simple task?

Thanks,
Haje

In order to search across files they need to be in your workspace.

See <http://stackoverflow.com/questions/1940675/how-to-search-all-open-files-in-eclipse>

You can also use working sets.

Cheers,
Scott
