Hi all,

I'm having a problem with the new graphics system in IDL 8.0. When I start up IDLDE and try to use the new graphics routines, none of them compile properly. I checked my path and it includes the default path; I added the idl80/lib folder as well just in case, and they still don't compile. I really don't want to have to compile all these routines by hand... any suggestions?
