Hi all,

I am trying to run an application (.sav file) using idl vm (version 6.3/4).

I get the following error message.

"The following error was encountered: keyword BITMAP not allowed in call to: WIDGET_BASE" please consult...

I want to read a bitmap (a logo) and display it on the GUI using the widget_base function.

Here is the part of the code..

```
file = 'logo.bmp'
```

```
osl_bmp = (file_search(ProgramRootDir(/oneup), file))[0]
```

```
p3dBase = WIDGET_BASE( GROUP_LEADER=wGroup,$  
                      bitmap= osl_bmp, xsize=xs, .....)
```

any idea about the error? (Of course the codes work in the debug mode.)

Any kind of help would be appreciated.

Thanks!

Rajiv
