Subject: IDl on Cygwin
Posted by Giuseppe Papa on Sat, 16 Oct 2010 14:14:44 GMT

I am working in a research institute where IDL is installed on a common server and the front-end are installed on PCs.
I use Cygwin utility for my work. I installed R in Cygwin and there are C++, perl and compilers in it too.
Similarly, I want IDL in Cygwin. I would like to know how can the front end be installed on Cygwin?

Thanks,
Jayant
