Subject: Syntax Highlighting of user DLM's

I have created a user DLM and wanted to know if their is a way to have
the function color highlighted when I call it from IDL.

e.g, If I call myfunc,a,b from a DLM that I have made the myfunc is
not syntax highlighted.

This is not a major issue just a pain the rear when i am trawling my
code and skip past it because i don't see it.

Cheers
Andrew
