Whoops! Never mind. My fault entirely! I ran a program in my startup file that set !P.Position, something I don't ordinarily do, but which is necessary for some book figures I am creating. Naturally, you can't use both !P.MULTI and position the plot at the same time.

Sorry for the bogus post.

Cheers,

David

Perhaps you should change your alter ego from Coyote to Chicken Licken.

:~)

:~)

Let's just say IDL 8.0 has me REALLY confused most of the day! It's hard to tell what is real and what is justifiable paranoia. :~)

Cheers,

David
