```
IDL> help,!version
** Structure !VERSION, 8 tags, length=104, data length=100:
ARCH      STRING  'x86_64'
OS        STRING  'linux'
OS_FAMILY STRING  'unix'
OS_NAME   STRING  'linux'
RELEASE   STRING  '8.0.1'
BUILD_DATE STRING 'Oct 7 2010'
MEMORY_BITS INT    64
FILE_OFFSET_BITS
          INT    64
```

It did not require me a new license file, the one I had for 8.0 kept working.
