Try TVREAD and TVWRITE from Coyote.

Andrew

This works for me

```
WRITE_PNG, 'filename.png', TVRD(TRUE=1)
```

Is png_file a valid file name (ending in .png)?

Ken Bowman

```

Yes, it is a valid file name ending in .png that I set at the command to begin.

Andrew,

I appear to get the same error when using TVREAD. And I get it over
an over again like it is doing a repetitive process.

% X windows protocol error: BadMatch (invalid parameter attributes).
% X windows protocol error: BadMatch (invalid parameter attributes).
% X windows protocol error: BadMatch (invalid parameter attributes).
% X windows protocol error: BadMatch (invalid parameter attributes).
