Hellow,

I am trying to use the David Fanning's histoplot and a syntax error occurs.

```
axisColor = FSC_Color(axisColorName, FILE=file)
                ^
```

% Syntax error.

At: /home/Tuna/SAG2Plots/histoplot.pro, Line 365

I call histoplot from another .pro and i have also the FSC_Color in my directory. Does anyone know what is my mistake ?

Thanks in advance
