Are you saying that the actual physical layout of the widgets is rendered incorrectly? Only half a widget appears, of something like that?

Cheers,

David

Yes David, that is exactly what's happening. When considering the x dimension everything renders exactly how it should (including the "virtual" parts of the window which are hidden), however the the y dimension does not render properly (the parts of the window which are initially hidden never fully render).

Regards,
Pedro Barata
