Hi there,

I am wanting to 'append' an ascii file - but instead of appending the new data to the bottom

I want the new data to be at the top of the file.

Does anyone have any suggestions ?

Example: I have a file that currently consists of:

ABCDEFGF

My new data is : HIJKLMN

using OPENU /APPEND and PRINTF I can very easily append the file to get this:

ABCDEFGF

HIJKLMN

.... but I want the appending to be at the top - ie, I want to end up with this:

HIJKLMN

ABCDEFGF

Any ideas ?

George.
