
Subject: secondary y-axis won't plot on right hand side of graph

Hi all,

I am trying to plot a secondary y-axis on my graph, but it keeps ending up to the left of the original y-axis and does not plot the lines of the secondary x or y axis to close the box around the graph. The tickmarks and values are also facing in the same direction as the primary axis. The script I have written is as follows:

```
p4 = plot(T, axis_style = 1, color = 'purple', ytitle = 'Temperature')
```

```
p5 = plot(albedo, /current, axis_style = 0, tickdir = 1, color =  
'green')
```

```
p6 = axis('y', target = p5, textpos = 1, title = 'Albedo')
```

Any help would be greatly appreciated!
