I ran into a strange problem with cgtext. The two line program below works fine if I don't plot to a resizable graphics window. but if I run

```
IDL> test,/window
```

the orient=90 keyword seems to be ignored.

```
pro test,window=window  
cgplot,indgen(10),window=window  
cgtext,1,1,'This should be vertical',orient=90,window=window  
return  
end
```

--Wayne

P.S. My last update of the CG library was today at 10:30 AM EST
