My only request is errorbars and legends... but I'm fine with waiting  
for CG2.0. :)

Wayne has updated all these routines in the IDL Astronomy Library to work with the Coyote Graphics routines. I think there were 16-20 different routines all together. Since most of these routines are related to graphics, rather than astronomy, Wayne and I have talked a little bit about me taking the graphics routines over. I haven't followed up on this yet because I have been so busy with other things.

Anyway, you can get them at the IDL Astronomy Library site.

Cheers,

David
