Hi,

I am not a regular reader of this newsgroup (I know I should but ...). I have a customer who has HDF files with Scientific Data Sets in it and he would like to read them into IDL or PV~Wave without having to translate them. I checked the FTP sites idlastro.gsfc.nasa.gov and boulder.colorado.edu and didn't see anything I thought was appropriate. So does anyone have such a beast? Please send email and I will post a summary (assuming I get a useful response).

B Cing U

Buck
