If you're on a Mac, you could get IDL to spawn an AppleScript which
tells Excel to add a pic to a given sheet in a workbook...

I'd think that if this were possible on Windows your best bet would be
ActiveX/COM objects. See the IDLcomIDispatch object for details.

And go with God :)

Thanks guys for the help, after consulting with ITT I was told the
best way to achieve that is by writing a macro in Excel to do the job
and call it from IDL.
