
Subject: Changing Plot Parameters in cgWindow
Posted by [David Fanning](#) on Fri, 06 May 2011 20:37:35 GMT

Folks,

Someone asked me this morning how to change plot parameters in a cgWindow application. In answering, I discovered that in one of my updates I had inadvertently switched the order of two parameters in a call to the LinkedList method `Replace_Item`. Thus, any call to the cgWindow method `ReplaceCommand` was throwing an error.

I have fixed the cgWindow code and you can download the updated version here:

<http://www.idlcoyote.com/programs/cgwindow.pro>

It occurred to me that others might be interested in the answer to this question, so I wrote an article about it.

http://www.idlcoyote.com/cg_tips/chgplot.php

Cheers,

David
