
Subject: Red and Green Colors Swapped when Printing from Mac

Hello,

I am using IDL 8.1 on MacOSX 10.6.7. When trying to print a plot using IDL Graphics, I noticed that the red and blue color components are swapped on the printout. This happens for BARPLOT and CONTOUR. However, the COLORBAR associated with the contour prints out correctly. Also printing the window of IMAGE function also prints the correct colors.

Anyone seen this problem and knows what causes it?

Thanks a lot
