Seems OK for me

```
set_plot,'ps'  
{ x86 Win32 Windows Microsoft Windows 8.1 Mar 9 2011 32 64}  
print,!d.x_size, !d.y_size  
17780 12700
```

Yep, my fault. It seems .Full_Reset doesn't clear this setting in PostScript. I needed to completely exit IDL.

Cheers,

David
