Hi

I prefer reading this group as netnews service. Unfortunately my current provider removes that service.

Which netnews provider for this group is available?

cheers
Reimar

Hi Reimar,

I am using since a couple of years news.individual.de from FU Berlin.
However it costs 10€ per year! It is worth the service!

Karsten

I have not enough details to send a subscription request to:

<http://gmane.org/subscribe.php>

and we can then have access by news.gmane.org (free of charge)

""""

Gmane is a mailing list archive.

Any public mailing list can be carried by Gmane, but the vast majority

of the lists here deal with free software.

""""

Hopefully someone can provide details to fill into that form.
I don't have the valid "Mailing list email address"

cheers

Reimar

Thank you

that saves me!

cheers

Reimar

Euhm, comp.lang.idl-pvwave is a newsgroup, not a mailing-list, or am I missing something?

You are right, thought it can manage it too.
