Subject: multiple plots of different size on same page
Posted by Alexandra Laeng on Tue, 19 Jul 2011 23:41:41 GMT

Hi everybody,
put multiple plots of same size on a page is a standard thing.
Does somebody by any chance knows if it would be possible
to plot with IDL multiple plots of different sizes on a same page ?
For example, to have 3 boxes like this

_____   _____   _____
|_____|  |_____|  |_____|

Alex
