Folks,

There is a very good chance my web page is going to hit four million page downloads sometime later today. (I might not be here, as I have to play tennis tonight!) This is cause (well, we have to be cheerful about *something*!) for celebration.

I'm going to give a free booklet, How To Get the Most Out of Your Dysfunctional Function Graphics System, to the person who downloads the lucky page!

Happy clicking!

Cheers,

David

P.S. The count is 3,999,788 at Tue, 13 Sep 2011 21:06:06 GMT, if you want to write an IDL program that gives you the auspicious time to click.

We have a winner! The lucky clicker is from the University of Arizona. They came to the page by searching for "idl plot gridlines", and found the 4 millionth page: Adding a Grid to a Line Plot. They downloaded this page at 6:18 PM Mountain Time this evening.

Please identify yourself! :-)

Cheers,

David

Doh, and I so wanted your booklet! I'll have to take my click armies

elsewhere.

Woo-hoo! Way to go, U of A! Or should I say, "Bear down!"

Hopefully it's someone from the Optical Sciences Center, aka Meinel Building.

Ed Meinel

P.S. Yes, he's my father.
