Hello guys,

Is it possible to compile and execute a routine from the command line without using a SAV file?

I am trying to find a combination of options to do what I want but I

I am trying to find a combination of options to do what I want but I don't actually know if this is possible. Something like:

idl -e "@compile_all.g & CALL_ROUTINE"

or

idl -batch @compile_all.g -e "CALL_ROUTINE"

Nothing works!

I would like to avoid the creation of the sav file. Thank you for your help,

nata
