Hello guys,

Is it possible to compile and execute a routine from the command line without using a SAV file ?

I am trying to find a combination of options to do what I want but I don't actually know if this is possible. Something like:

```
idl -e "@compile_all.g & CALL_ROUTINE"
```

or

```
idl -batch @compile_all.g -e "CALL_ROUTINE"
```

Nothing works !

I would like to avoid the creation of the sav file. Thank you for your help,
natha
