Hi all,

I need to use a binary file created in IDL to read in JAVA, but i'm having trouble.

My code in IDL: <http://pastebin.com/183KXxke>

My code in JAVA: <http://pastebin.com/nbscx7sM>

I created a matrix: mat=[[0.10000000, 0.20000000],[0.40000000, 0.50000000]]

So, when i do: print, mat[0,0] ...the result is 0.100000 that is correct

But in the JAVA when i do: System.out.println("The value is " + aux[i][j]);

The result is

O valor da aux -4.29492128E8

O valor da aux -4.28443584E8

O valor da aux -4.2949216E8

O valor da aux 8.8E-44

That is incorrect.

But i don't know what is wrong

Can you help me??

Thanks,
