```
file = 'mydata.txt'
rows = File_Lines(file)
data = Fltarr(5,rows)
OpenR, lun, file, /Get_Lun
ReadF, lun, data
Free_Lun, lun
columnToAdd = Findgen(rows)
newData = [data, Reform(columnToAdd, 1, rows)]
OpenW, lun, file, /Get_Lun
PrintF, lun, newData
Free_Lun, lun
```

Cheers,

David
