Subject: widget_slider cross platform (from windows to Mac)
Posted by sarah_englander on Wed, 11 Jan 2012 15:37:59 GMT

Hi all,

I am trying to make a widget program I wrote on windows work correctly
on a MAC.
I am having trouble with the widget_slider.

For the Mac I made the width larger (xsize for vertical and ysize for
horizontal) to show text.

Does anybody know why there are no slider arrows on the Mac??
