
Subject: NC_check_name error when using NCDF_VARDEF

Hello All,

I am trying to write out some data in IDL 8.0.1 and keep encountering the following error:

```
idl: string.c:177: NC_check_name: Assertion `name != ((void *)0)' failed.
```

which results in IDL aborting. I have checked to ensure my dimensions are the correct sizes and I have not mistyped anything. The error is occurring when the program reaches "varvid=NCDF_VARDEF(fid,variable,[lonid,latid,timid,memid],/FLOAT)". Here is the code for writing out the file:

```
fid=NCDF_CREATE('/Volumes/Disk2/Data/Volcanic_Impact/atmos_'+variable(i)+'_el_chichon.nc',/CLOBBER)
```

```
lonid=NCDF_DIMDEF(fid,'longitude',nx)  
latid=NCDF_DIMDEF(fid,'latitude',ny)  
timid=NCDF_DIMDEF(fid,'time',48)  
memid=NCDF_DIMDEF(fid,'member',17)
```

```
lonvid=NCDF_VARDEF(fid,'longitude',[lonid],/FLOAT)  
latvid=NCDF_VARDEF(fid,'latitude',[latid],/FLOAT)  
timvid=NCDF_VARDEF(fid,'time',[timid],/FLOAT)  
memvid=NCDF_VARDEF(fid,'member',[memid],/FLOAT)
```

```
varvid=NCDF_VARDEF(fid,variable,[lonid,latid,timid,memid],/FLOAT)
```

```
NCDF_CONTROL,fid,/ENDEF
```

```
NCDF_VARPUT,fid,lonvid,lon  
NCDF_VARPUT,fid,latvid,lat  
NCDF_VARPUT,fid,timvid,vtime  
NCDF_VARPUT,fid,memvid,INDGEN(17)  
NCDF_VARPUT,fid,varvid,vimpact
```

```
NCDF_CLOSE,fid
```

I would greatly appreciate any assistance or insight.

Sincerely,

Jason
