Subject: Lion Time Machine error
Posted by Kenneth P. Bowman on Sun, 27 May 2012 15:51:43 GMT

I know this is an old error, but I have not been able to resolve it using the suggested fixes.

I installed IDL 8.2 on my Macbook Pro, which runs OS X 10.7.4 (latest release of

When I start IDL 8.2 in a Terminal window in that account, I get the familiar Time Machine error:

I have tried the recommended fix, which is basically to run IDL with higher

work.

This problem does not occur with other accounts on the same computer.

Any suggestions?

I am planning to post this in the IDL newsgroup to see whether anyone in the community has found a fix that works.
