folks

hi,

I need to apply for axis and fonts in plots like this:

`p = plot(vert[0,*],vert[1,*], 'or', /SYM_FILLED, SYM_SIZE=0.5, NAME='Red data')`

in iplot i could do major & minor ticks, tick direction and axis fonts etc. how could i do it in `p=plot(...)`.

Any kind of help would be appreciated,

Cheers,

Dave
