Subject: IDL Mollweide map projection can't get to work Posted by Spencer[1] on Fri, 22 Jun 2012 21:22:07 GMT

Hello,

I have a regularly gridded lat-lon data in a 2D array. I am struggling to plot this data on a Mollweide projection of the whole globe with continental boundaries overlaid and centered at 150W longitude. I've thoroughly confused myself trying to use the various IDL mapping functions.

I'd really appreciate any help.

Thanks, Spencer
