Subject: include COI on wavelet plots using toolkit
Posted by djhalbeck on Sun, 08 Jul 2012 22:30:37 GMT

Hello,

Does anyone know if there is a way from inside the IDL Wavelet Toolkit
to plot a cone of influence curve over a wavelet power spectrum? I know how to add it using the
older wavelet.pro routine, but I want to add it using wv_applet," and wv_import_data so that I have
the interactive widget. Any info is appreciated.
