; test.pro
pro test_pro, azimuth, x1
help, azimuth
x1=143
print, 'after x1=143'

```
help, azimuth, x1  
end
```

```
pro test  
azimuth=34  
test_pro, azimuth, azimuth  
end  
; test.pro end
```

```
IDL> test  
% Compiled module: TEST.  
AZIMUTH      INT      =      34  
after x1=143  
AZIMUTH      INT      =      143  
AZIMUTH      INT      =      143  
IDL>
```
