
Subject: Can't launch IDL DE anymore...

Posted by [stefan.meingast](#) on Mon, 10 Sep 2012 07:58:31 GMT

[View Forum Message](#) <> [Reply to Message](#)

Hey

I use IDL on two computers and I think some things are getting synced via Dropbox. The problem now is that after working during the weekend on my computer at home I can't launch it anymore on my station at work.

I have no idea how to fix or reset the workspace and I hoped one of you could help. :(

thanks

Here is the log output:

```
