Holy snot. This is great!

My only comment, after browsing it for about 30 seconds, is a purely asthetic one to perhaps adjust the CSS files to reign in the rampant font sizes.

But, other than that, yay! I can now write IDL code on my home computer without having to have a browser open (with the regular IDL help), connected to my work computer via VPN through a pokey DSL line.

Thanks to all at Exelis/IDL who were involved.

cheers,

paulv
