IDL is not distributed with the county data base you are seeking. You will
have to load the data, and maybe write some code to plot it. You may find
that sort of data at a number places. I've seen (but not used) something
like it from the US census at URL:
  http://www.census.gov/geo/gis/gis-fag.html , or
  http:/tiger.census.gov/
good luck.
