Hi everyone,

I have a widget driven analysis routines, with the code that I am running. The problem is I am able to plot the results of the code with the help of the widget. But unable to see the result as text file.

Could anyone please help me in getting the result as text file.

thanking you in advance

sid

Because I dont know anything about the file.

XDR formatted files are not "text" files. They are binary files. If you don't know anything about them they are essentially impossible to read. Sorry.

Cheers,

David
