Look for the release number within the version information of
widget_info:

```
IDL> print,widget_info(/version)
{ Windows Win32 5.1}
```

This is what I get on WinXP.

Heinz

Hi,
For Win 7 I get version 6.1... funny counting. After some research I found the following matches (not tested!):

Win 95: 4.0

Win 98: 4.1

Win XP: 5.1

Win Vista: 6.0

Win 7: 6.1

Win 8: 6.2

This can is given directly as string with:
`print, (widget_info(/version)).Release`

Thanks for the tip!
Helder
