
Subject: x-axis label in plot procedure

This is probably simple for experienced users but not for me!

I am plotting plots on top of each other. They are all time series and I just want the time x-axis labels displayed in the bottom plot. In the 'plot' procedure, how do I remove the x-axis label (while keeping the x-axis i.e. just removing the time).

The code looks like this:

```
pp1 = PLOT(x, y, 'r', $
  xrange=[70000,85000], $
  yrange=[1,10000], $
  font_size=10, $
  POSITION=[.12,.75,.9,.95], $
  LINESTYLE = 'solid_line', $
  /ylog, $
  title = datefninput, $
  ;XTITLE = 'Time (UTC)', $
  YTITLE = 'Conc (nmg)')
```

Hello,

By "on top of each other" do you mean overplotting, or a grid of plots on a page?
