Hello there, I am plotting both scattered points and lines and I would like to create just one legend with both symbols points and lines. I tried

```
al_legend, ['symbol1','symbol2','line'], psym =[4,2, -1], linestyle=[-1, -1,1]
```

I want a list with `psym=4` `psym=2` and `linestyle=1`

how do I do that?
