
Subject: cgplot and eps

I am trying to save a plot to eps, I use the keyword output in cgplot, but this doesn't work with overplot, because it only write to eps the portion of the plot that is being drawn. example:

```
window,0  
cgerase  
cgplot, x, y, output='out.eps'  
cgplot, x, t, /overplot
```

and moreover the part that is being printed to eps is not shown in window 0.

I know I can use ps_start and ps_end, but I would like to know if there is a way that allows me to visualize the plot on x window and to print to eps at the same time.

Thanx
