Hello!

I am using IDL 7.1.2 under Windows 7 (64 bit). Since 2 days I have a crazy behaviour when I call the DIALOG_PICKFILE() function. When I call this function the interpretation of floating points changes:

```
IDL> print, 1.5
      1.50000
IDL> print, dialog_pickfile()
IDL> print, 1.5
      1,00000
```

I found already a posting in this group (see the link below).

https://groups.google.com/forum/#!searchin/comp.lang.idl-pvwave/dialog_pickfile/comp.lang.idl-pvwave/FOK3FW1D9KA/FVF-2yw 3tf4J

I tried the mentioned suggestions but they did not help me to solve my problem. I hope that somebody can help me to solve my problem?

Thanks in advance and best wishes,
Hannes
