Hi, To draw a map,

```
MAP_SET, /STEREOGRAPHIC, 90,0,0,/ISOTROPIC,/continent,/HORIZON,/noborder
```

```
MAP_GRID, LABEL=1, LATS=0,latdel=30,lonlab=1,lonalign=1.
```

I want to put longitude label 0,45,90,..... outside the big circle (equator). I change lonlab and lonalign but cannot find a method to do it. How can I do?
