There are a few ways I can get OS usage statistics for IDL, but none of them are great, so I'd like to try a direct appeal. On what operating systems do you use IDL? Please let me know; vote in the poll on the IDL blog:

<http://idl.datapoint.com/2013/02/21/poll-on-what-operating-systems-do-you-use-idl/>

I'll keep the poll open for a week and report the results next Thursday.

I've closed my (thoroughly unscientific) IDL OS poll. Check the results at:

<http://idl.datapoint.com/2013/02/21/poll-on-what-operating-systems-do-you-use-idl/>

Despite being a Linux fanboy, I expected more votes for Mac OS X. And although this is anecdotal, it's interesting to note that over half of the respondents (60 percent, in fact) use a UNIX-based OS.
